---

## PROFESSIONAL SUMMARY

- Full Stack Software Engineer with 4+ years of experience designing and developing scalable applications across Banking, Healthcare, and Consulting domains.
  - Experienced in building modern web applications using Java, Spring Boot, Python, React, Angular, REST APIs, SQL, and cloud-native technologies.
  - Hands-on experience building AI and ML-powered applications including Retrieval-Augmented Generation (RAG) systems, analytics platforms, recommendation engines, and document intelligence applications.
  - Strong background in full-stack development, microservices architecture, API development, database design, cloud computing, and DevOps automation.
  - Proven ability to design and deliver end-to-end software products, from responsive frontend experiences and backend services to cloud-ready deployments and business intelligence dashboards.
  - Passionate about solving business problems by combining software engineering best practices with data-driven and AI-powered capabilities.
- 

## CORE EXPERTISE

- Full Stack Software Development
  - Frontend Engineering and Responsive Design
  - Backend API Development and Microservices
  - AI and ML Application Development
  - Generative AI and Retrieval-Augmented Generation (RAG)
  - Cloud-Native Application Development
  - Database Design and Integration
  - Business Intelligence and Analytics Platforms
  - DevOps and CI/CD Automation
  - Secure Software Development
  - Agile Software Delivery
- 

## TECHNICAL SKILLS

- **Frontend:** React, Angular, TypeScript, JavaScript, HTML5, CSS3, Responsive Web Design, Reusable Component Design
- **Backend:** Java, Spring Boot, Spring MVC, Python, FastAPI, REST APIs, Microservices, SQLAlchemy, Pydantic
- **Artificial Intelligence & Data:** Generative AI, Retrieval-Augmented Generation (RAG), NLP, Document Processing, Pandas, Data Analytics, Customer Segmentation, Recommendation Systems, Risk Scoring, Business Intelligence
- **Cloud & DevOps:** AWS, Docker, Kubernetes, Jenkins, GitHub, Git, CI/CD Pipelines, Containerization, Cloud-Native Applications
- **Databases:** PostgreSQL, MySQL, SQLite, SQL

- **Engineering Practices:** Object-Oriented Design, API Security, Secure SDLC, Unit Testing, Integration Testing, Code Reviews, Agile, Scrum
- 

## **PROFESSIONAL EXPERIENCE**

### **Full Stack Software Engineer | Wells Fargo | North Carolina, USA**

**February 2026 – Present**

- Developed and maintained 15+ Spring Boot microservices and REST APIs supporting digital banking applications and customer-facing workflows.
  - Built reusable Angular components and shared UI modules that reduced duplicate frontend development effort by approximately 30% across multiple banking applications.
  - Designed and integrated REST APIs handling high-volume customer and account data transactions, improving data exchange reliability between internal banking systems.
  - Containerized applications using Docker and deployed cloud-native services on AWS, reducing environment setup and deployment dependencies for development teams.
  - Implemented Jenkins CI/CD pipelines that reduced manual release activities and improved deployment consistency across development and test environments.
  - Participated in modernization initiatives by migrating legacy functionalities into microservice-based services, improving application maintainability and deployment flexibility.
  - Resolved production issues and performed root cause analysis, reducing recurring incidents through code fixes and monitoring improvements.
  - Collaborated with product owners, QA teams, and cross-functional stakeholders to deliver banking features through Agile sprint cycles.
- 

### **Software Engineer | Medica | Minesota, USA**

**August 2024 – January 2026**

- Developed healthcare applications using Java, Spring Boot, and Angular to support customer enrollment and healthcare management workflows.
  - Designed backend services and REST APIs that streamlined communication between frontend applications and healthcare systems.
  - Built reusable frontend components that reduced feature implementation effort and improved UI consistency across healthcare modules.
  - Developed Docker-based deployments and cloud-ready application configurations, simplifying environment provisioning and release activities.
  - Automated build and deployment workflows using CI/CD pipelines, improving release reliability and reducing manual deployment tasks.
  - Participated in debugging and performance optimization activities that improved application stability and reduced issue resolution time.
  - Worked closely with engineering and business teams to deliver secure and scalable healthcare applications.
- 

### **Assistant Software Engineer | Tata Consultancy Services (TCS) | India**

**January 2021 – January 2023**

- Developed enterprise web applications using Java and Spring technologies supporting business process automation and customer-facing workflows.

- Designed and implemented REST APIs and backend integrations for multiple enterprise applications and business services.
  - Built reusable frontend modules and shared components that improved development productivity and reduced duplicate implementation effort.
  - Developed SQL queries and database integrations supporting reporting requirements and business operations.
  - Participated throughout the software development lifecycle including requirement analysis, development, testing, deployment support, and production issue resolution.
  - Collaborated within Agile teams to deliver scalable and maintainable software solutions across multiple releases.
- 

## PROJECTS

### 1. FinGenie AI Banking Intelligence Platform

**Technologies:** React, FastAPI, Python, Pandas, REST APIs, Recharts

- Developed an AI-powered banking relationship intelligence platform for customer financial analysis and risk assessment.
  - Implemented financial health scoring, customer segmentation, and risk classification capabilities.
  - Built recommendation workflows for banking products and customer relationship insights.
  - Designed analytics dashboards and visualizations to support data-driven decision making.
  - Developed an AI-powered assistant capable of generating customer intelligence and portfolio summaries.
- 

### 2. MedAssist AI Healthcare RAG Assistant

**Technologies:** React, FastAPI, RAG, NLP

- Developed an AI-powered healthcare document intelligence platform using Retrieval-Augmented Generation architecture.
  - Built document upload, ingestion, retrieval, and question-answering workflows.
  - Designed end-to-end document processing pipelines for intelligent information retrieval.
  - Implemented source-aware responses and contextual document analysis capabilities.
- 

### 3. SmartInvest Portfolio Manager

**Technologies:** React, FastAPI, SQLAlchemy, SQLite

- Developed an investment portfolio management platform for tracking investments and portfolio performance.
  - Implemented CRUD operations, portfolio analytics, and dashboard reporting capabilities.
  - Designed REST APIs and database models for investment management workflows.
  - Built interactive charts and analytics visualizations for financial reporting.
- 

### 4. CloudOps Manager

**Technologies:** React, FastAPI, SQLAlchemy, SQLite, Recharts

- Developed an incident management and service monitoring platform for operational teams.
  - Implemented incident tracking, SLA monitoring, and operational analytics dashboards.
  - Designed backend APIs and database schemas for incident management workflows.
  - Built interactive dashboards for service health and operational reporting.
- 

### 5. CustomerInsight Analytics

**Technologies:** React, FastAPI, Pandas, Recharts

- Developed a customer analytics platform for customer segmentation and business intelligence reporting.
  - Implemented churn risk scoring and customer recommendation workflows.
  - Designed dashboards and reporting systems for customer analytics and retention analysis.
  - Built data ingestion and processing workflows using Python and Pandas.
- 

## **EDUCATION**

- Master of Science in Computer Science, Southeast Missouri State University | GPA: 3.8 / 4.0
- 

## **CERTIFICATIONS**

- Oracle AI Vector Search Certified Professional
- Oracle Cloud Infrastructure 2025 Certified Generative AI Professional
- Oracle Cloud Infrastructure 2025 Data Science Professional
